Code & UI Generation TAM

GARTNER, MARKETSANDMARKETS

↓ 10x

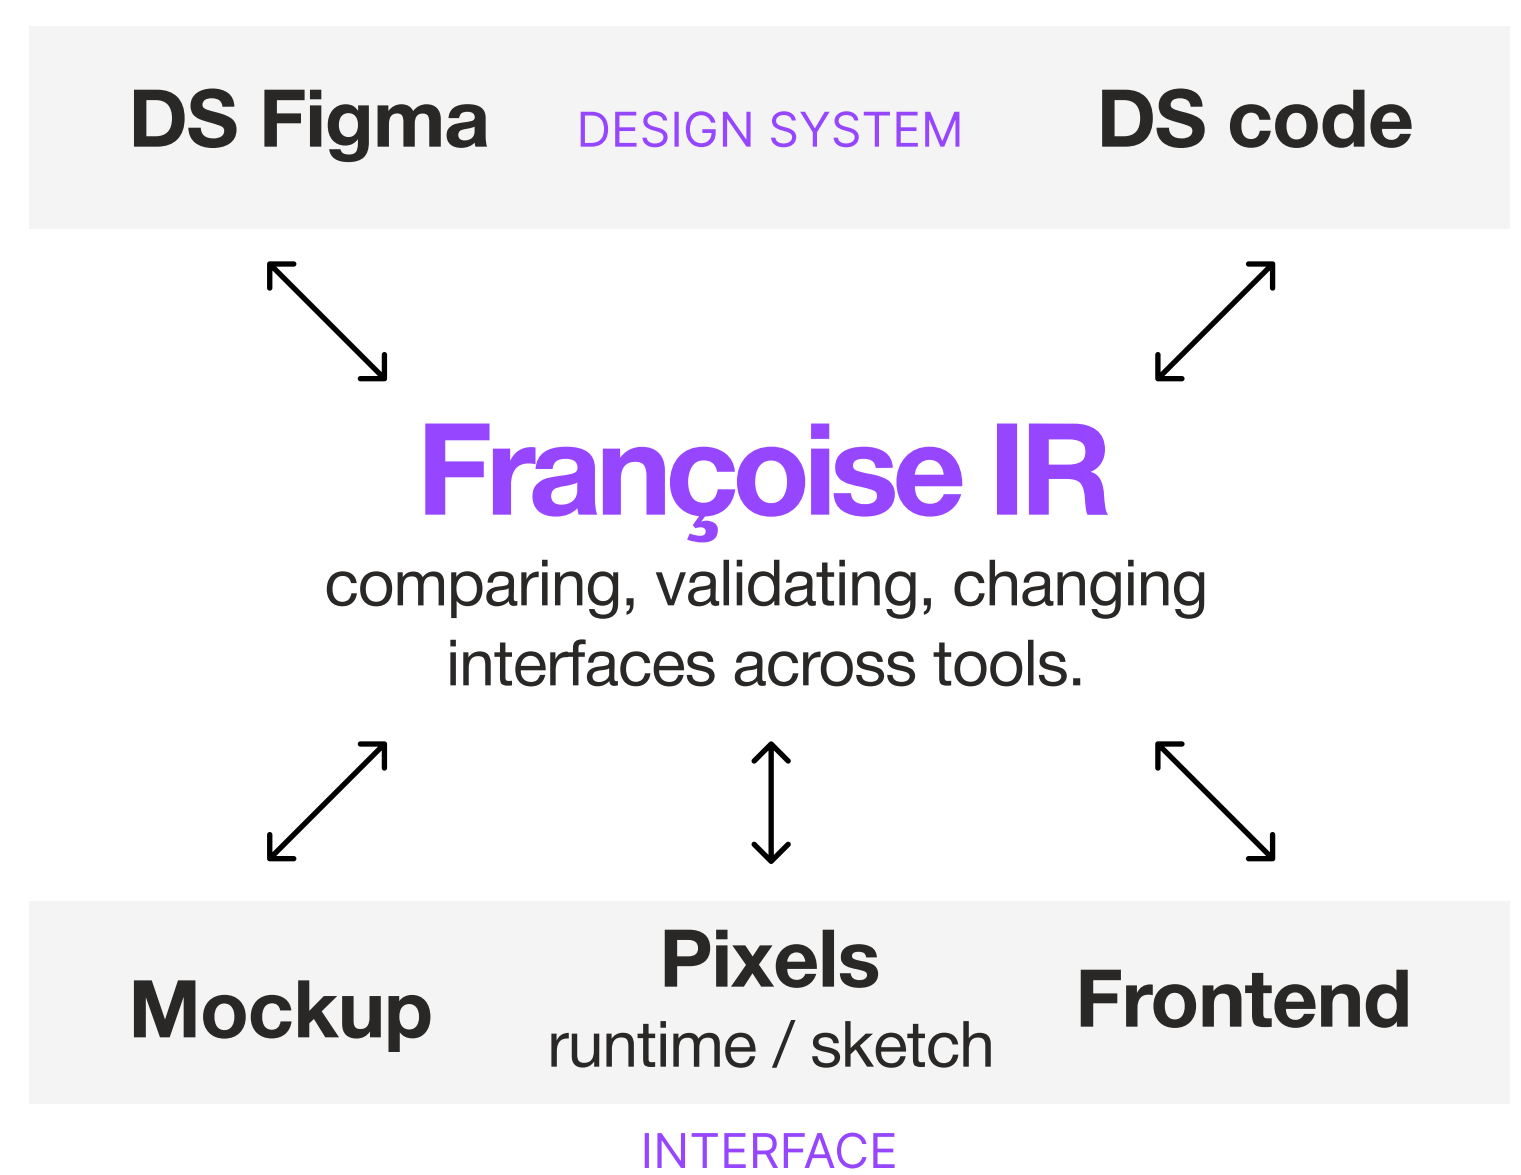

Inference Token Reduction

TECHNOLOGY

Algorithmic moat: Graph compiler eliminates visual hallucinations and slashes token consumption by up to 10x.

Data moat: Production deployments grow a proprietary corpus of UI rules and edge cases, hard to reproduce without enterprise access.

Platform neutrality: Single canonical representation bridging design, runtime UI, and production codebases.

PRODUCT

Figma copilot **LIVE**

Detects and fixes UI inconsistencies.

MCP / Agent API **NEXT**

Brings the interface model to AI workflows.

TRACTION

30 Active B2B Design Practitioners

Month 1 Post-Launch

Organic Paid Subscription

First corporate seat purchased self-serve

TEAM

BOTH ARE MATH OLYMPIAD WINNERS

Daria Kamyshina CEO

ex-Yandex; led 300+ person product orgs.

Victor Pisarevskii CTO

Former Tech Lead at Sber; built systems serving 10M+ users.

LAND & EXPAND ACV
